Update on Transforming GP services in Hull proposal

Following the recent patient and public engagement on the possible relocation of Faith House Surgery staff and services:

We would like to thank you for sharing your views and any concerns about the proposed changes. We have received 1,361 completed surveys and 207 people attended drop in events.

Absolutely no decisions have been made regarding any changes at this stage. We are listening to local people's views and we are taking some time to pause and reflect on the feedback you have shared.

As soon as our GP Partners have carefully considered the feedback, we will publish a report and our findings and we will explain what will happen next.
